Rub 'n' Buff

FAS Super Tempera Metallic is a school poster paint that offers bright bold richly formulated metallic colours. Non-toxic and water-soluble. Colours can be rubbed and buffed-up like a shoe polish to add an even more metallic sheen.

CE

Conforms to ASTM D4236

Permanent metallic colours are available in the Student Acrylic range.

Concentrated
Just add Water

600g Pot
12 per carton

Non-toxic • Bright clean colours • Long shelf life

Just add water to create bright colourful paint for the school classroom with no lumps!

FAS School Powder Paint offers a long shelf life and the advantage of making up the desired quantity of paints as you need it.

Powder Paint is a brilliant, opaque concentrated powdered tempera colour which can be mixed with water on a palette, made up in a jar, or used by dipping a wet brush into the dry powder.

Powder Paint is made from non-toxic, finely ground pigments giving a bright full strength colour to your finish. This multi-purpose paint can be used for a variety of techniques from finger painting to general art and craft work. Best suited for ages 2+

TIP: This paint will thicken and dissolve any lumps if you allow it to stand for a few hours before use.

Tempera Stackers Washable - Non-Toxic

Set of 18 intense and vibrant water colour discs in convenient, stackable, interlocking palettes. Use a wet brush to sweep across the blocks and start painting. Contains 2 whites.

PREMIUM QUALITY **total** **WASH** KIDS' PAINT

Totally washes from clothing!

This paint **WILL** wash out of ALL kid's School Clothes.

Designed to wash from most fabrics quickly and easily without all the fuss.

It couldn't be easier than this....

1. Rinse any excess paint from clothing.
2. Machine wash in warm water using a detergent suitable to the fabric. Repeat if required.

This paint also washes out of fabrics just by soaking in warm water

Until now it has been thought to be impossible for a full range of colourful school paints to completely wash out of kids' clothes and school uniforms. Parents have been complaining for years about residue staining left in favourite clothes from paints used at school.

But FAS Total Wash changes all that as this educational paint is guaranteed to totally wash out of clothing quickly and easily.

In the past with other brands of school paint, clothing would have to be washed and rewashed, using strong stain removers, special soaps and even soaking in strong bleach for days. But the staining still remained and will not budge.

FAS Total Wash takes all the work out of washing and more importantly also the staining. Paint splashes left on clothing over a period of time can still be removed weeks later on first wash.

Glitter Paint

REAL SPARKLE
Seriously Colourful

Bold, vibrant colour just loaded with sparkling glitter!

500ml
All colours
12 per carton

Colourful and sparkly glitter in a bright and semi translucent paint base.

A simple and clean way to apply colourful glitter effects to your artwork without getting glitter everywhere.

It's so easy to get an irresistible and intense, sparkling glitter finish on almost any surface. This glitter paint creates a rich, jewel look, and the glitter does not fall off when dry. If required, apply the glitter paint thicker for a more concentrated sparkly finish.

Ideal for special effects on art and craft projects in the classroom and Christmas decorations.

Clean up brushes and hands in soap and water.

High Definition Formulation

FASTEX Textile Ink®

WASH RESISTANT - NON FADING - NON-TOXIC

HD High Definition for screen printing that's clearer and crisp right down to the smallest details.

Paint and print your own clothing.

- Multi-purpose fabric painting and printing colour • Water-based and Non Toxic • Particularly soft to touch

Create your own clothing designs with the brilliant colours of FAS Fastex textile fabric ink.

Ready-to-use and highly concentrated, FAS Fastex textile fabric inks create beautiful effects on natural and selected synthetic fibres. Fastex is easy to apply and particularly soft to touch. Fastex has fresh and intense colours that are truly versatile. Ideal for painting and screen printing, they become completely resistant to washing and dry-cleaning.

All colours mix easily and deliver excellent non-fading light-fastness. The fluorescent colours are less resistant to fading. Use the Fastex Extender Medium to reduce the depth of colour without losing any non-fading or lasting properties.

This ink requires heat setting to seal the ink into the fabric.

NB: Not for commercial use

FINEART STUDIO PRINTING INK

HIGH TACK - BRIGHT COLOURS - NON-TOXIC

ARTIST BLOCK PRINTING INK

Fine Art Studio Printing Ink is a range of intermixable water-soluble block printing colours.

Used by professional artists' and students working with wooden blocks, lino and vegetable cuts to create a design that is transferable from a block to paper or fabric with the use of lino rollers. Studio Ink layers well and offers a uniform coverage, excellent definition with an even detailed print.

120ml Jars
All colours
24 per carton

There is a choice of 17 bold, brilliant and opaque colours, including amazing old vintage photography shades. The colours can be combined with the Studio Printing Ink Extender which gives more transparency to colours making them ideal for layering or overlapping. Studio Printing Ink is non-toxic, water-based, and washes up easily in water.

Conforms to ASTM D4236

Flint Water Based Printing Ink

ARTIST BLOCK PRINTING INK

Professional grade
High pigment loading
with good coverage

115ml tubes

Professional water-based printing ink with good coverage and printing properties. Can be successfully applied to a variety of different surfaces such as paper card, stretched canvas, wood metal, plastic acetate glass. Safe alternative to oil-based inks.

HELPFUL HINT: In cold weather, stand the tube in warm water for 3-4 minutes to assist in squeezing out the ink and making rolling out easier.

painting DYE

powder concentrate

NON-TOXIC - BRIGHT CLEAN COLOURS - LONG SHELF LIFE

FAS Painting Dye is a New Zealand concentrated water-soluble craft dye that may be used as watercolour paint, drawing ink, a colour wash or a non-permanent fabric dye.

Each 30-gram jar of powder dye dissolves in warm water to make up a quantity of 3 litres of an intense, powerfully bright, colourful watercolour dye. An economical solution for classroom watercolour painting projects. Just add water to make up intense bright colours as you need it. Then, get creative and apply wax crayons or FAS cold wax as a wash, ink drawings, brush painting, colouring, and paper mache. An alternative mix with a starch-based paste for screen printing or a no-fuss finger paint.

Use on paper, wood, fabric, and filters for hours of endless fun. Paint with eye droppers, spray bottles, or even a brush to create unique, colourful designs and unique artworks. Once dry, the dye remains non-permanent and water-soluble. Wash up equipment with soap and water. Painting Dye can stain clothes. Therefore, it is recommended protective clothing or old clothes.

Paint Scraper Set

Scraper Artwork

Explore colours, experiment with lines and add dimension to paintings with these Paint Scrapers, which allow you to scrape the paint across the page. These scrapers come in a pack of 4 in assorted shapes and are ideal for painting activities at home or school. Pack of 4 paint scrapers in assorted shapes Perfect for exploring colours, experimenting with lines and adding dimensions to paintings

Primal Painting Medium

A multi-purpose medium which can be used to thin acrylic paint, increase the open working time, as a sealer, and a clear varnish or to change the sheen levels of acrylic paints.

Sealer: Can be used straight from the bottle as a sizing/sealer on wood, canvas or cotton duck to seal the surface and prevent absorption of paint into the fabric.

Thinning: When added to acrylic paints it dilutes the viscosity and blends colours without losing pigment solids and intensity. This increases the open working time and translucency. Use generously with acrylic paint or spread liberally over the surface to be worked on for wet-over-wet or wet over dry techniques.

Varnish: Primal can be used as a water based non-toxic over-varnish for acrylic painting. Provides a non-tacky protective coating. It is non-removable, however can be over painted. Clean up with soap and cool water.

White & Black
24 per carton

250ml
White & Black
24 per carton

FAS Gesso Primer is a fast-drying waterproof primer, sealer and undercoat that is applied prior to painting. Use for both oils and acrylics. FAS Gesso is available in Black or White and can be mixed with an acrylic colour to produce a range of coloured backgrounds. Use directly from the jar but can be mixed with water for thinner applications. Ideal for surface preparation and sealing of artist canvas, linen and board. Like all types of painting surface preparation is critical to the final durability of your painting.

FAS Gesso dries very quickly and can be painted over as soon as it is completely dry to touch. A very light sand with a light grade sand paper between coats may offer better tooth and last ability. It is better to paint two or more thin coats than to paint one thick coating.

Black

White

Indian Ink DRAWING INK - LIGHTFAST - JET BLACK

1 Litre
12 per carton
