

# Colour Mixing Guide

A colour wheel is the perfect reference for learning colour theory. By using 3 primary colours, paint can be mixed together to create new colours. White is used to lighten (tint) and black to darken (shade).

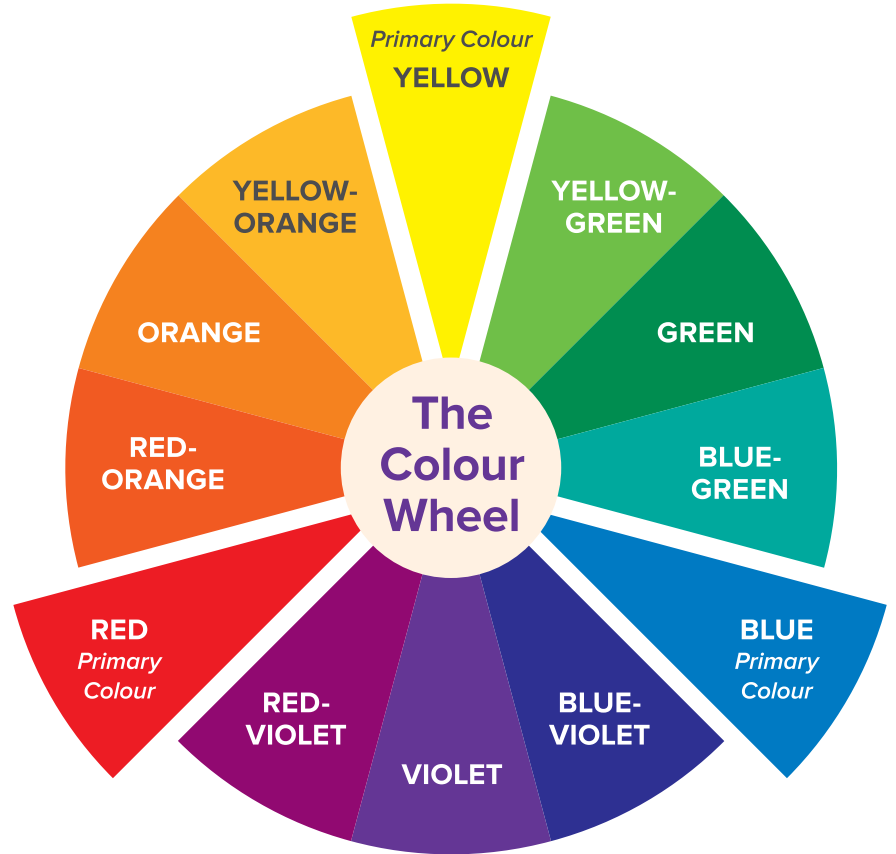

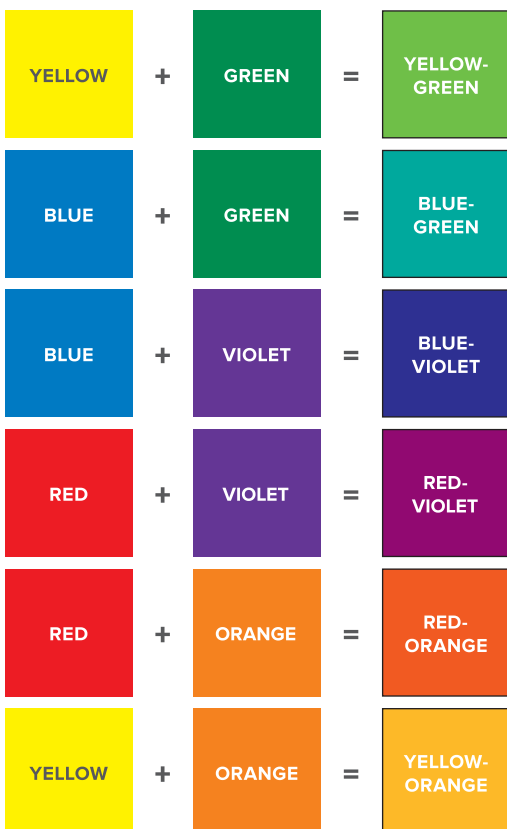

**Primary Colours** - cannot be made from mixing other colours.

**Secondary Colours** - made by mixing two primary colours.

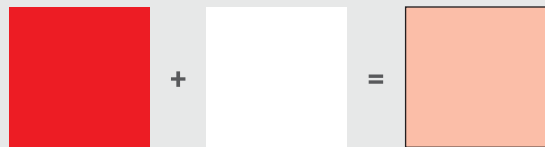

**Tertiary Colours** - made by mixing one primary colour with an adjacent secondary colour.

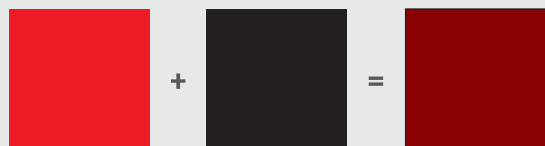

## Tint

Colour plus white to lighten.

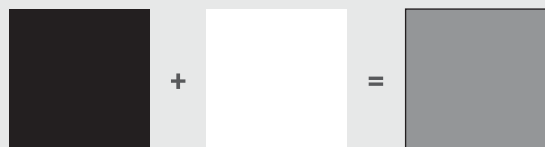

## Shade

Colour plus black to darken.

## Grey

Mix black and white to create different degrees of grey.

# Colour Wheel Template

Make your own colour wheel. Photocopy this template and print onto thicker paper that can be painted on.
